

## Testimonial

Simply stated, Dr.DiLeva is my **miracle**.

After 3 years of misdiagnosis from numerous veterinarians, my dog finally has hope and health. Dr.DiLeva stops at nothing to find a cure, not simply applying useless "band aids" to temporarily halt the symptoms. In her "gentile toughness" she suggests, thinks and acts. The animal world should give her sainthood.

Through herbs, acupuncture, and traditional Chinese medicine you can rest assured know that your animal will receive a new life. She stops at nothing!

Even a simple cut led me to a discovery. I witnessed how my dogs' wound healed so quickly with the help of her healing salve so, I decided to use it on a razor cut of mine, which severed my artery. The human doctors were amazed at the rate in which my wound healed and that the feeling came back so quickly. I will never be without her salve in my home.

Again, Dr. DiLeva is a gift. When I look into my dog's eyes, I know she is the reason they speak of happiness and health. Bless her and her truly patient, kind and giving staff.

Nacine S. and "Varga"

\* Note from Dr. DiLeva: Varga was born in December of 2000 and is an un-neutered male German Shepard weighing approximately 100 lbs. (and has always been a pleasure to work with). Varga originally came to me for uncontrolled seizures in spite of being on conventional medication. Varga's seizures were everyday and numerous times a day at one point. Presently Varga has not had a seizure in over 8 months. If he has one it is short in duration, not as severe, he recovers quicker than before and is off **all** conventional medication. He now comes in for acupuncture treatments on an as needed basis.
